

Watch Out!

Mofuss couldn't find the compiler of **TeX** files to **PDF** inside your computer.

Did you download and install the [Basic MikTeX](#)? (32-bit or 64-bit depending on your system). Please do it even if you already have any working TeX/LaTeX system. **Its important that you close the Wizard before installing MikTeX.** Then, open the Wizard again and run the last script (e.g. ICS scenario).

Alternatively, try to compile the following file:

“.../Mofuss/LaTeX/Mofuss_Summary_Report.tex” using your TeX/LaTeX editor.
